## News of China Zhongwang

### China Zhongwang Joins "Carbon Audit • Green Partner" Programme

2013-07-09

China Zhongwang Holdings Limited (HKEx: 01333) is committed to building a low-carbon society. As part of the efforts, the Group has signed up to support the "Carbon Reduction Charter" devised by the Environmental Protection Department of Hong Kong Special Administrative Region (HKSAR) recently. As "Carbon Audit • Green Partner," the Group has pledged to save energy and reduce greenhouse gas emissions in order to improve the air quality.

## Industry Updates

### Whose Dream to Fly

2013-07-11

Advanced aluminum alloy materials have unique characteristics, such as light weight, high melting point, high ramming force, good ductility, corrosion-free and fatigue resistance.

### The Floating City in the Ocean

2013-07-11

In fact, aluminum alloy has been widely used in the manufacturing of various kinds of vessels due to its properties of light weight, good performance in corrosion resistance, formability, weld ability and recyclability.

## About China Zhongwang Holdings Limited

**China Zhongwang** is the second largest industrial aluminium extrusion product developer and manufacturer in the world and the biggest one in Asia and China. It has, over the years, been focusing on the light-weight development of transportation, machinery and equipment and electric power engineering sectors through the provision of quality industrial aluminium extrusion products. It now has 93 globally advanced extrusion production lines (including eight aluminium extrusion production lines of 75MN or above under installation), among which the 125MN oil-driven dual action extrusion press is currently one of the largest and most advanced of its kind in the world. In addition, to further leverage its existing strengths in the industry, the Group is developing the high value-added aluminium flat rolled product business. The first phase of the project with an annual capacity of 1.8 million tonnes of high-end aluminum flat rolled products is expected to gradually commence production by 2015 and the overall designed production capacity of 3 million tonnes will be realized in 2018.
