### Tianjin Zhongwang's Casting Mill Finishes its First Trial Run

The #5 casting line at Tianjin Zhongwang's casting mill successfully produced the first three 2xxx aluminium alloy slabs. Subsequently, the line further produced three more 2xxx hard alloy slabs, followed by two additional batches totaling six hard alloy slabs in succession. The successful trial of #5 casting line indicates the smooth running of the casting process, which sets forth a solid base for continuous trial runs in the hot rolling plant and for the whole production process.

### Tianjin Zhongwang's Hot Rolling Mill Finishes its Trial Run

Tianjin Zhongwang's hot rolling mill plant successfully rolled an aluminium alloy slab into the first hot rolled coil of the project. This achievement paved a solid foundation for the optimizing of rolling mill parameters in the future.

### China Zhongwang Net Profit Increases by 30% to RMB2.52 Billion in the First Three Quarters of 2015

During the first three quarters of 2015, the Group's revenue rose 3.0% year-on-year to RMB12.68 billion. As sales of high-end industrial aluminium products increased, together with reduced raw material costs due to a decline in the price of aluminium, the Group's gross profit margin increased by 6.2 percentage points to 34.8%. Profit attributable to equity shareholders surged by 29.1% year on year to approximately RMB2.52 billion.

Guotai Junan issued an update report on China Zhongwang, stating that the Group's 3Q2015 results beat expectations, and reiterated their "BUY" rating with a target price of HK\$4.68. You may scan the QR code on the left to view the full report at China Zhongwang's Wechat public account.

## [China Zhongwang Won Two City-level Awards of Scientific Technology](#)

The judging panel for scientific technology of Liaoyang People's Government has announced the winners for "2015 Liaoyang Scientific Technology Award". China Zhongwang won two awards for its technologies, namely the first prize for 32T-80T manufacturing technology of tilting-type aluminium alloy melting furnace and the second prize for aluminium alloy semi-trailer car body and its manufacturing technology.

### **About China Zhongwang Holdings Limited**

China Zhongwang is the second largest industrial aluminium extrusion product developer and manufacturer in the world and the biggest one in Asia. It has, over the years, been focusing on the light-weight development of transportation, machinery and equipment and electric power engineering sectors through the provision of quality industrial aluminium extrusion products. It now has over 90 internationally advanced aluminium extrusion production lines including 21 production lines of large-scale aluminium extrusion presses of 75MN or above.

In addition, to further leverage its existing strengths in the industry, the Group is developing the high value-added aluminium flat rolled product project. With a total designed annual production capacity of 3 million tonnes, the project is scheduled for development in two phases. Phase I of the project with a planned annual production capacity of 1.8 million tonnes consists of two production lines. Plant construction and equipment installation for the first production line have been completed and the equipment testing of the entire production line at the Tianjin plant is being carried out and is expected to be commissioned by the end of the year. This new business venture will not only enable the Group to further capitalize on its leading edge in aluminium alloy smelting and casting and product research and development, but also achieve synergies with its existing industrial aluminium extrusion and deep processing businesses by taking full advantage of their customer and market resources in related downstream application sectors.
